Spectrum Hospital Intensive Care Unit

Your standard product frame

Gentle curving 22' wide workstation with façade covering standard 2' wide panel frames with power chase-ways, skins and 30" standard end caps.

Your standard product + our custom facade

The face is clad in hospital-approved Acrovyn with vertical metal accents at 4' seams. The work surface is customer-specific laminate and edge banding that incorporates an extended area to be A.D.A. compliant.

Any shape.

Any design.

before:

Your standard product

Your standard frames reconfigured into any shape

after:

Your standard product + our custom facade

Let us give your existing standard product added warmth and appearance that can be unique to each facility while maintaining all the functionality and features your customers expect.

Includes 3-Form Thatch accent panel on standoffs with back-lit L.E.D. lighting and a custom Corian transaction top.

Pennsylvania Children's Hospital

Nurture by Steelcase Grand Rapids Showroom

A workstation that is predominately standard product inside and out, joined together by a curving millwork wall that is the same thickness that creates a seamless appearance.

The same hospital compliant Acrovyn wood-grain material and a horizontal metal band is applied to the outer surface of the millwork and standard metal skins to give the look of 100% custom millwork.

Concept to Completion

Our design and engineering team will work with you every step of the way to assist you in designing the best layout to utilize your space, provide an elegant appearance and aesthetic appeal along with practicality and ease of use.
